"Our clients range from corporations to event planners and brides – anyone who is looking to add style and grace to their special event" Jessica explains.

HOW DID YOU GET STARTED IN THE INDUSTRY? My career began in the corporate world in the early 90s working in event management. Wanting a change I moved into weddings and corporate events and saw an opportunity to service the industry with a higher level of attention after my own experiences with suppliers. It was then I discovered my true passion – styling.
