

Simply Beautiful

Event styling and planning specialist Jessica Aguilera, founder of Angelic Events and Design, has been creating dream weddings for couples for more than eight years. Her goal is to always exceed client's expectations in bringing the wow factor to each and every event. We asked Jessica how she maintains her fresh and exciting approach to styling and where she gets her inspiration.

What sets you apart from other stylists? From the minute my brides walk into my boutique I make them feel comfortable and relaxed. I treat every wedding as if it was my own. From an early age I have always loved beautiful things and I am now blessed to work in an industry where I can inspire brides with the latest trends and styles.

How would you describe your style? New York Contemporary and French Elegance with a splash of Vintage. Every year I travel to New York and LA to keep up with the latest trends and styles within the industry. I am also a big fan of the 1940s and 1950s eras.

What do you see as the popular trends at the moment? Vintage Glamour, Black & White and Contemporary Nautical

What was your most memorable/challenging wedding? I recently had an extremely distressed bride contact me the

morning before her big day. Her florist had closed business and was nowhere to be seen so my team and I worked 30 hours straight designing all centrepieces and bridal party blooms for a wedding of 220 guests. It was a big challenge but very satisfying. Three days later her family came with a gift for each of my fabulous team.

Five words that best describe you? Creative, organised, relaxed, confident and original

What is the best compliment a couple can give you? Thank you very much for your friendly, professional service and attention to detail. We loved it that our guests walked into the room and immediately knew they were in for a fabulous time. From the minute we met, you understood our vision and created the wedding of our dreams!

Secret Style

For a royal and glamorous theme, team vintage blooms with gold tiffany chairs and use specialty linens. Lighting can create that intimate and romantic feel so adding in a grand chandelier can add to the ambience. For special touches look at using an elegant napkin ring along with a charger plate for each of your guests.
